Material Safety Data Sheet
For Coatings, Resins and Related Materials

NOTE: CHEMTREC, CANUTEC and National Response Center emergency numbers to be used only in the event of chemical emergencies involving a spill, leak, fire, exposure or accident involving chemicals.

24 Hour Emergency: 1-800-123-4567 CHEMTREC: 1-800-424-9300
National Response in Canada CANUTEC: 613-996-6666
Outside U.S. and Canada Chemtrec: 202-483-7616

Section 1 - Chemical Product / Company Information

Product Name: MIL-PRF-85582D-TYPE I-CLASS C1 BASE
Revision Date: 06/21/2011
Identification Number: 44GN007
Print Date: 
Product Use/Class: EPOXY PRIMER BASE
NSN: 
Manufacturer: Deft, Inc. (CAGE CODE 33461)
17451 Von Karman Ave
Irvine, Ca. 92614
Information Phone: (949) 474-0400
Emergency Phone: (800) 424-9300

Section 2 - Hazards Identification

*** Emergency Overview ***: Flammable liquid and vapors. Harmful by inhalation, in contact with skin, and if swallowed. Contact with eyes or skin causes irritation.

Effects Of Overexposure - Eye Contact: Exposure to liquid, aerosol, or vapors may cause irritation, tearing, redness, and swelling accompanied by a stinging sensation. Contact with eyes may cause blurred vision and irritation.

Effects Of Overexposure - Skin Contact: Direct skin contact may cause irritation. Symptoms may include swelling, burning, redness, itching, and rash. Prolonged or repeated skin contact may cause dermatitis, drying, and defatting due to the solvent properties. May cause allergic skin reaction. May cause severe skin irritation. It is possible for one of the components to pass through the skin, and the component may add to the toxic effects of either ingestion or inhalation.

Effects Of Overexposure - Inhalation: Inhalation may cause irritation to the respiratory tract (nose, mouth, mucous membranes) & acute nervous system depression characterized by the following progressive steps: headache, nausea, weakness, dizziness, staggering gait, confusion, fatigue, drowsiness, unconsciousness, or coma. Exposure may cause a sore throat, runny nose, difficult breathing, shortness of breath, or coughing. Inhalation of decomposition products in high concentration may cause shortness of breath (lung edema). Inhalation may cause headaches, difficult breathing, and loss of consciousness. A component maybe harmful if inhaled.

Effects Of Overexposure - Ingestion: Ingestion may cause irritation to mucous membranes. May result in possible corrosive action in the mouth, stomach tissue, and digestive tract. Vomiting may cause aspiration of the solvent, resulting in chemical pneumonitis. Ingestion may cause nausea, vomiting, abdominal pain, and diarrhea. Ingestion may cause nervous system effects, which may include headache, dizziness, numbness, staggering gait, or confusion.

Effects Of Overexposure - Chronic Hazards: Prolonged contact will cause drying and cracking of the skin, due to defatting action. Skin sensitization, asthma, or other allergic responses may develop. Kidney and liver damage may occur from prolonged or repeated overexposures. Repeated and prolonged exposure may cause delayed effects involving the blood, gastrointestinal, nervous, and reproductive systems. Exposure to a component may cause kidney damage, coma, difficult breathing, liver damage, blood abnormalities (breakage of red blood cells), blood in the urine, or death.

Primary Route(s) Of Entry: Skin Contact, Inhalation, Eye Contact

Section 3 - Composition / Information On Ingredients

ALL INGREDIENTS ARE ON THE TSCA INVENTORY LIST, UNLESS OTHERWISE NOTED IN SECTION 8.

**Section 4 - First Aid Measures**

**First Aid - Eye Contact:** If material gets into eyes, flush with water immediately for 15 minutes. Hold eyelids open to rinse out the entire eye. Consult a physician. If symptoms develop from airborne exposure, move to fresh air.

**First Aid - Skin Contact:** Remove contaminated clothing and shoes. In case of contact, immediately flush skin with plenty of water and wash affected areas thoroughly with soap and water for at least 15 minutes. If symptoms develop (such as irritation), consult a physician or get medical attention. Wash contaminated clothing thoroughly before reuse or discard.

**First Aid - Inhalation:** Move to fresh air in case of accidental inhalation of vapors. Give oxygen or artificial respiration if needed. Asthmatic type symptoms may develop and maybe immediate or delayed by several hours. In the case of inhalation of aerosol/mist, consult a physician, if necessary.

**First Aid - Ingestion:** Do not induce vomiting. Never give anything by mouth to an unconscious person. Consult a physician.

**Section 5 - Fire Fighting Measures**

**Flash Point (°F):** 116 TCC

**LOWER EXPLOSIVE LIMIT**

**UPPER EXPLOSIVE LIMIT (%):** 10.

**(%):** 1.0

Extinguishing Media: Carbon Dioxide, Dry Chemical, Foam, Water Spray, Dry Sand, Dry Powder

**Unusual Fire And Explosion Hazards:** Keep containers tightly closed. Isolate from heat, sparks, electrical equipment and open flame. Closed containers may burst if exposed to extreme heat or fire. Application to hot surfaces requires special precautions. Toxic gases may form when product burns. Vapors are heavier than air and may travel/spread along the floors/ground. Vapors may flow along surfaces or they can be moved by ventilation, to a distant source of ignition. Do not use a cutting or welding torch near or on a drum of product, because vapors may ignite explosively, even if the drum is empty and contains only product residue. Peroxides of unknown stability and that are explosive may form.

Special Firefighting Procedures: In the event of fire, wear self-contained breathing apparatus. Firefighters should wear full protective clothing. In the event of fire, cool tanks with water spray.

**Section 6 – Accidental Release Measures**

Steps To Be Taken If Material Is Released Or Spilled: Evacuate all non-essential personnel. Remove all sources of ignition. Ventilate area. Contain and remove spilled material with inert absorbent and non-sparking tools. Dispose of as hazardous waste. Dike to prevent entering any sewer or waterway. Soak up with vermiculite or inert absorbent material and dispose of as hazardous waste. Only trained personnel wearing protective equipment should handle spill cleanup. Avoid personal contact.

**Section 7 - Handling and Storage**

Handling: Prevent prolonged breathing of vapors or spray mist. Avoid contact with eyes and skin. Do not take internally. Do not handle until the manufacturers safety precautions have been read and understood. Handle in accordance with good industrial hygiene and safety practice. Keep away from heat and sources of ignition. Use safety precautions with empty containers. Empty containers may contain hazardous materials (product residues) in the form of solids, liquids, or vapors. Always use grounding leads when transferring from one container to another.

Storage: Store in buildings designed to comply with OSHA 1910.106. Avoid storing near high temperatures, fire, open flames, and spark sources. Keep containers upright to prevent leakage and tightly closed in a dry, cool, and well-ventilated place. Protect material from direct sunlight.

**Notes**

BARIUM CHROMATE CAS# 10294-40-3 - Contains 20.5 weight % Hexavalent Chromium, IARC Group 1 carcinogenic to humans. NTP group 1 known carcinogen. ACGIH category A2 (2002) suspected human carcinogen. Inhalation of 30 mg/m3 of Hexavalent Chromium is immediately dangerous to life or health. Ingestion of high concentration may cause intense thirst, shock, dizziness, oliguria, severe circulatory collapse, vomiting, anuria, or abdominal pain. Death may occur due to uremia. Ingestion in one uptake of approximately 1-16 g
Engineering Controls: Local ventilation of emission sources may be necessary to maintain ambient concentrations below permissible OSHA exposure limits. Remove all ignition sources (heat, sparks, flame, and hot surfaces).

Respiratory Protection: A respirator that is recommended or approved for use in an organic vapor environment (air purifying or fresh air supplied) is necessary. Observe OSHA regulations for respirator use. Ventilation should be provided to keep exposure levels below the OSHA permissible limits.

Skin Protection: Solvent-resistant gloves.

Eye Protection: Wear safety eyewear (safety glasses, safety glasses with side-shields, chemical goggles, or face shields) to prevent eye contact.

Other protective equipment: Long sleeve and long leg clothing is recommended. Remove and wash contaminated clothing before reuse or discard. Wear boots that are chemical-resistant.

Hygienic Practices: Wash hands before breaks, eating, smoking, using washroom, and at the end of the workday.

Section 9 - Physical and Chemical Properties

- Boiling Range (°F): 308 - 343
- Vapor Density: > 1 (AIR = 1)
- Odor: 2-BUTOXYETHANOL & AROMATIC HYDROCARBON SOLVENTS
- Odor Threshold: N.D.
- Appearance: Green liquid
- Evaporation Rate: ND
- Solubility in H2O: ND
- Freeze Point: N.D.
- Specific Gravity: 1.520
- Vapor Pressure, mm Hg: 3.6
- PH: N.A.
- Physical State: Liquid
- Viscosity: > 18 #2 ZAHN CUP SECONDS

(See section 16 for abbreviation legend)

Section 10 - Stability and Reactivity

Conditions To Avoid: Avoid high temperatures. Epoxy resins under uncontrolled conditions. Do not breathe vapors or spray mist.

Incompatibility: Material is incompatible (reacts) with oxidizing agents (strong oxidizers), strong acids (including exothermic reactions with strong acids), strong alkaline, strong reducing agents, epoxy resins, isocyanate functional materials, heat, aluminum, and salts of strong bases. Material is incompatible with oxidizing agents. Material is incompatible with acids and bases. Reacts with amines and mercaptans.

Hazardous Decomposition: Thermal decomposition can lead to the generation and release of gases and vapors including carbon monoxide, carbon dioxide, and oxides of nitrogen. Chromium oxides when burned. Thermal decomposition may generate irritating gases and vapors. Ketones, organic acids, and aldehydes may form.

Hazardous Polymerization: Polymerization may occur.

Stability: Stable under recommended storage conditions.

Section 11 - Toxicological Information

Product LD50: N.E. Product LC50: N.E.

Section 12 - Ecological Information

Ecological Information: No Information.

Section 13 - Disposal Information

Disposal Information: Dispose of waste in accordance with federal, state, and local environmental regulations. Empty containers will contain product residue and flammable vapors. Handle as hazardous material. Do not incinerate closed containers. EPA Hazardous Waste Number/Code: D001, D007.

Section 14 - Transportation Information

DOT Proper Shipping Name: Paint Packing Group: III
CERCLA – SARA Hazard Category
This product has been reviewed according to the EPA ‘Hazard Categories’ promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories: IMMEDIATE HEALTH HAZARD, CHRONIC HEALTH HAZARD, FIRE HAZARD

SARA Section 313:
This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendment and Reauthorization Act of 1986 and 40 CFR part 372:

<table>
